

Phil Ross Selected as Recipient of Hotbels BTU Award

During Hotbels, the annual glass industry seminar sponsored by Hotwork-USA and Fosbel, the inaugural BTU (Business & Technology United) Award was presented to Phil Ross, President of Glass Industry Consulting International of Laguna Niguel, California. The BTU award is a new addition to the Hotbels seminar this year and was developed to recognize key contributors to Hotbels. Phil has been instrumental in the development of Hotbels over the years and initially proposed the idea of the glass industry seminar.

The 22nd Hotbels Seminar was held in Lexington, Kentucky, USA on April 17th & 18th, and featured a number of informative presentations by glass industry suppliers. The seminar is held each year and serves as a forum for sharing innovations in engineering and technology throughout the glass industry. To receive information about next year's seminar when it is available, contact Hotwork-USA or Fosbel by email at Hotwork@hotwork.com or Fosbel.inc@fosbel.com.
